

STRUCTURE FOAM ADHESIVE BOND

- Super-strength hardscape foam adhesive
- Developed for the construction industry
- Precise delivery - No mess, no waste
- Adjustable bead size

*Set time will vary according to air moisture

Super quick and easy application

StructureBond™ is an innovative super-strength foam adhesive that bonds a wide range of construction materials such as pavers, concrete, natural or synthetic stones, bricks, wood, plywood, composite materials, drywall, steel, aluminum, PVC, fiberglass and porcelain.

StructureBond™ is made from high-quality modified polyurethanes. Its adhesive strength is unmatched among all types of polyurethane adhesives.

Application time is up to 50% faster than with conventional tube adhesives. Materials are bonded in just 8 minutes and adhesive is fully cured within 24 hours.

StructureBond Gun allows for a precise adhesive delivery with a single pull of the trigger that stops as soon as you let go. It requires no pumping, cutting or puncturing of cartridge nozzles. Gun is easily cleaned with practical cleaner cartridge available from Techniseal.

One container of StructureBond™ is equal to five 10 oz tubes of standard adhesive.

Specifications:

Volume: 667 ml - Weight: 24.03 oz [680 g]

Set time [open time]: <8 min. - Cure time: 24 hrs
