

STRUCTURE™ FOAM ADHESIVE BOND

- Super-strength hardscape foam adhesive
- Developed for the construction industry
- Precise delivery - No mess, no waste
- Adjustable bead size

*Set time will vary according to air moisture

SUPER QUICK AND EASY APPLICATION

Structure Bond™ is an innovative super-strength foam adhesive that bonds a wide range of construction materials such as pavers, concrete, natural or synthetic stones, bricks, wood, plywood, composite materials, drywall, steel, aluminum, PVC, fiberglass and porcelain.

Structure Bond™ is made from high-quality modified polyurethanes. Its adhesive strength is unmatched among all types of polyurethane adhesives.

Application time is up to 50% faster than with conventional tube adhesives. Materials are bonded in just 8 minutes and adhesive is fully cured within 24 hours.

Structure Bond™ Gun allows for a precise adhesive delivery with a single pull of the trigger that stops as soon as you let go. It requires no pumping, cutting or puncturing of cartridge nozzles. Gun is easily cleaned with practical cleaner cartridge available from Techniseal.

One container of Structure Bond™ is equal to twenty 10 oz tubes of standard adhesive and yields an amazing 600 ft. with a 3/8" bead.

Specifications:

Volume: 22.5 US fluid oz - Weight: 24 oz
Set time (open time): <8 min. - Cure time: 24 hrs
